

Please strengthen the federal do not call law and do not weaken the state of NJ's do not call law. A person should be able to have complete and utter privacy in their home; telemarketers, as well as email spammers need to be completely blocked from calling or emailing unless people indicate they want to hear from them. The burden should be on companies to obtain permission to contact people; it should NOT be on people who have to continuously indicate they do not want to be contacted by advertisers.
